ERD:SRG:12422

Operable Unit Number 2 Non-Aqueous Phase Liquid Expedited Action

Ned Hutchins, Acting Associate General Manager
Environmental Restoration Management
EG&G Rocky Flats, Inc.

In our October 21, 1993, letter (ERD:SRG:12132) to the Environmental Protection Agency (EPA) and the Colorado Department of Health (CDH) (attached), we agreed to begin scoping meetings with them on an Expedited Action for the Non-Aqueous Phase Liquid (NAPL) encountered in Operable Unit (OU) No. 2 (903 Pad, Mound, and East Trenches). A scoping meeting is scheduled for the week of November 9, 1993. You agreed to pursue this NAPL Expedited Action as a test case to demonstrate to EPA, CDH, and DOE that EG&G could expedite action at Rocky Flats.

The scoping and early implementation of an action to remove the NAPL in OU-2 is important because our performance may directly affect the willingness of EPA and CDH to re-negotiate the InterAgency Agreement. Therefore, there is potentially a lot at stake if we can not demonstrate the ability to streamline administrative processes and take early action.

Therefore, you will begin preparation for scoping this project. Considerations in the scoping would include: potential contaminants, size of the action, fugitive emissions, work health and safety, disposition of the wastes generated during the action, as well as how to deal with regulatory and/or administrative issues. You also need to develop funding and scheduling alternatives, including re-priorization of other activities. ✓

If you have any questions, please contact Scott Grace at extension 7199.
